

# Relay Audit Report

Audit ID: RR-2026-069-00005

Generated: Mar 10, 2026 • 09:11 AM

**\$796**

Recapturable Annual Spend

*Equivalent to 10.1x the cost of this audit.*

**83 / 100**

Health Score — STABLE

Total Zaps Analyzed: **6**

Status: **No active automations detected**

High Priority Issues: **1**

Estimated Remediation Time: **40 minutes**

## Priority Actions (<15 min)

---

**Test Zap 1**

**Root Cause: Formatter Chain Redundancy**

Merge multiple formatting steps into a single operation to reduce task duplication.

Impact: \$499/year

Effort: 15 min

**Root Cause: Suboptimal Filter Placement**

Move filter earlier in workflow — prevents unnecessary execution of upstream steps.

Impact: \$234/year

Effort: 10 min

**Share new RSS feed items to Buffer for social media updates**

**Root Cause: Formatter Chain Redundancy**

Merge multiple formatting steps into a single operation to reduce task duplication.

Impact: \$62/year

Effort: 15 min

---

*Workflow Pattern:* Linear chain with 3 conditional branches, 0 redundancies

# Infrastructure Risk Assessment

---

## Risk Summary

---

High Severity: **1**  
Medium Severity: **2**

## Pattern Analysis

---

Root Cause — Inefficient Logic:	3 instances
Root Cause — Redundant Steps:	0 instances
Root Cause — Non-Executing:	0 instances

*Isolated high-severity finding detected. Targeted remediation recommended.*

---

# Plan Analysis

---

Current Plan: **Professional**

Task Usage: **0%**

Zero task consumption detected during the analyzed period.

## Premium Features Detected:

- Filters
- Custom Logic

## Executive Verdict:

High Optimization Potential — plan cost exceeds operational value.

---

## Verified Stable Automations

---

The following automations require no action:

- Wordpress to Reddit
- Workflow ID: 288404013 — Name not defined in Zapier
- Workflow ID: 342951153 — Name not defined in Zapier
- Workflow ID: 342951555 — Name not defined in Zapier

These processes meet all efficiency benchmarks.
